

Precision is  
our business

## APPLICATION

The company CMS has developed a software tool to convert the raw data of a UV broadband detector to absolute units. It applies the calibration matrix (depending on solar zenith angle and total ozone) to the raw data.

## SPECIFICATION

**Solar Elevation:** Is taken into account during conversion of the raw data of a broadband detector to absolute units.

**Total Ozone:** Is taken into account during conversion of the raw data of a broadband detector to absolute units.
